Respiratory Outbreaks in Ohio

Respiratory Activity and Distribution in Ohio per MMWR Week

Respiratory Activity for Ohio				
Minimal	Low	Moderate	High	Very High

Respiratory activity in Ohio is *Minimal* for Week 44

Respiratory illness activity is monitored using the acute respiratory illness (ARI) metric. ARI captures a broad range of diagnoses from emergency department visits for respiratory illnesses, from the common cold to severe infections like influenza, RSV and COVID-19. It captures illnesses that may not present with fever, offering a more complete picture than the previous influenza-like illness (ILI) metric.
